

Patent Lawyer Surrey

Patent Lawyer Surrey - The lawyers within our office are focused on intellectual property rights. Our office completely understands that various companies view their intellectual property as their most valuable asset. To maintain and attract market share, intellectual property is key. It defines your company in the market place, whether by means of trademarks that identify your product, patents that exclude competitors, or copyright which stops illegal replication of your intellectual assets.

We have years of experience in the effective resolution and practical management of intellectual property disputes at all levels of the courts. Our clients comprise a wide range of industries, from start-ups to global corporations.

The primary factors which our companies believe should be the client's goals and what makes sense to them from a business standpoint. Each and every infringement on intellectual property rights would not in all instances warrant a court action. Intellectual property litigation is expensive due to the complexity of comprehensive analysis of rights and utilizing right professionals. Where infringement disputes are simple and straight-forward, disputes often can be resolved through negotiated settlements together with built in deterrence terms. In situations where court action is needed, we follow strategies which match a business-oriented method.

Our lawyers are knowledgeable in representing clients in intellectual property infringement claims. Whether you need defending against allegations of intellectual property infringement or an owner of intellectual property pursuing infringers, our litigators have the knowledge to communicate to the courts the technical matters involved. We provide legal advice and representation in disputes associated to patents, trademarks, copyright, trade secrets, domain names, industrial design, interlocutory injunctions ("emergency" relief from infringement awaiting trial) and Anton Pillar Orders (seizure orders and civil search).
